

## **The Access Grid: Software and Toolkit for Internet Collaboration**

**Presenter:**

Tom Uram – Argonne national Laboratory.

**Background:**

With several successful releases over the past few years, use of the Access Grid Toolkit has grown significantly around the world. With the introduction of version 2 of the toolkit, the Access Grid has integrated a framework for writing collaborative applications.

As a result, the Access Grid developer community is also growing, building applications to support a variety of collaborative science efforts.

This talk will provide an overview of the Access Grid Toolkit, from the perspective of the user and developer, give a sampling of deployment efforts, and discuss the future of the project.
